PROFESSIONAL SUMMARY

Cybersecurity professional in training with over five years of hands-on experience in data annotation and AI training, plus a Diploma in Information Technology. Currently advancing through ALX Africa's Cybersecurity track and pursuing CompTIA Security+ and ISC2 Certified in Cybersecurity credentials. Practical experience with Nmap, Wireshark, and Burp Suite, combined with strong web development skills and a track record of building and delivering full projects independently. Based in Gulu, Uganda, and focused on protecting the healthcare and community systems East Africa depends on.

WORK EXPERIENCE

Data Annotator & AI Training Specialist

Samasource Uganda Limited Nov 2020 – Feb 2026

- Annotated 2D and 3D datasets, including LiDAR point clouds, image sequences, and video data, across multiple high-volume AI training projects.
- Applied advanced annotation techniques (bounding boxes, polygons, cuboids, key points, semantic segmentation) with consistently high precision.
- Maintained strict adherence to client guidelines, meeting or exceeding project accuracy benchmarks across all engagements.
- Collaborated with QA teams to resolve inconsistencies and meet tight deadlines without compromising quality.
- Supported onboarding of new annotators, reducing ramp-up time through mentoring and system preparation.

Facilities Manager

Empowering Ugandans Apr 2021 – Apr 2023

- Managed end-to-end facility operations, ensuring safety, functionality, and a well-maintained environment for staff and visitors.
- Coordinated preventive maintenance and executed minor equipment repairs, minimising operational downtime.
- Maintained physical security protocols, including access control and closure procedures.

Cashier

Top-Star Guest House Apr 2020 – Nov 2020

- Managed daily financial transactions with full accuracy, maintaining balanced records and resolving discrepancies promptly.
- Delivered professional customer service, handling inquiries and complaints with composure.

Receptionist

Capital Guest House Jul 2019 – Apr 2020

- Managed front desk operations including guest reception, bookings, travel coordination, and multi-channel communication.

EDUCATION

Diploma in Information Technology

Cavendish University Uganda 2024 – 2025

- Focus areas: Web Development, Programming, Databases, Networking.
- Capstone project: IT-Online-Service, a web-based platform for requesting and managing IT support services.

Cybersecurity Track (in progress)

ALX Africa 2026 – Present

- Advanced programme covering network security, threat analysis, ethical hacking, and incident response.

Professional Foundations Programme

ALX Africa 2024 – 2026

- 12-week programme in professional skills, personal branding, and critical thinking. Completed.

UACE

Gulu Army Secondary School 2017 – 2018

UCE

Gulu Army Secondary School 2013 – 2016

TECHNICAL SKILLS

- Cybersecurity: Nmap, Wireshark, Burp Suite, vulnerability scanning, basic penetration testing, network defence, threat analysis
- Data Annotation & AI Training: 2D/3D annotation, LiDAR, image & sequence labelling, quality control
- Annotation Tools: Bounding boxes, polygons, cuboids, key points, semantic segmentation, Labelbox
- Web Development: HTML5, CSS3, JavaScript, PHP, Git, GitHub
- Microsoft Office Suite: Word, Excel, PowerPoint

SOFT SKILLS

- Attention to Detail
- Accuracy & Consistency
- Analytical Problem Solving
- Time Management
- Team Collaboration
- Adaptability
- Technical Communication

LANGUAGES

- English (Fluent)
- Kiswahili (Intermediate)
- Luo (Native)

PROJECTS

Kica Hope Restoration Mission

- Nonprofit website with a secured admin dashboard, Row Level Security policies enforced at the database level, and a role-based permission system. (HTML5, CSS3, JavaScript, Supabase)

IT-Online-Service

- Capstone project for the Diploma in Information Technology: a full-stack platform for requesting and managing IT support services. (HTML5, CSS3, JavaScript, PHP)

Home Network Security Audit

- Self-directed audit using Nmap and Wireshark; identified and documented three potential vulnerabilities with recommended mitigations.

Ker Properties

- Real estate platform with searchable listings by district and type, plus a client enquiry system. (HTML5, CSS3, JavaScript)

ACTIVITIES & INTERESTS

- Cybersecurity Practice
- Exploring AI & Data Tools
- Web Development Projects
- Tech Learning & Tutorials
